INTRODUCTION

LASER belongs to the French Family Group **EXEL INDUSTRIES**, world leader in agricultural spraying and beet harvesters and among the main world leaders in consumer watering and spraying industrial.

- World No. 1 in plant protection
- World No. 3 in materials protection
- 3,653 employees, of which 57.6% abroad
- Subsidiaries located in 27 countries on all continents
- 20 industrial sites around the world
- Over 326 active patents filed in many countries.

LASER

The LASER INDUSTRIE range of professional sprayers is dedicated to industry in all of its forms. Since 1991, we have been manufacturing high-performance, reliable sprayers that are technologically very advanced, designed to resist aggressive chemicals (acids, solvents, detergents, bases, etc.)

Our sprayers are used in various fields such as :

- Construction (main works, secondary works)
- Automotive
- Hygiene
- Livestock farming
- Agri-foods
- Pest control

LASER[®]

INDUSTRIE

LASER ADDED VALUES

- ✓ A diversified offer that adapts to the customer
- ✓ Made in France
- ✓ A responsive after-sales service with a catalog of 250 spare parts available
- ✓ Product reliability and safety thanks to our ISO 9001 standard

All of our sprayers with a volume greater than 2 liters are **made in France**, in our factory HOZELOCK-EXEL situated in Villefranche-sur-Saône in the heart of Beaujolais. We are proud to **support the local economy** and use **French know-how**.

With ISO 9001 certification, our company applies **demanding quality controls** to all the manufacturing processes in order to **provide quality and safety** which complies with the requirements of the Machine Directive.

Customer service

- We keep parts of our old models available for up to 10 years
- Our devices are guaranteed for a minimum of 2 years in accordance with the regulations in force.
- We provide a spare parts catalog with exploded views of our products

LASER INDUSTRIE

a customised, high-performance and reliable sprayer range

Specially suited for the needs of industry, the LASER INDUSTRIE range of sprayers was designed to resist aggressive chemicals for intensive use such as concentrated acids, alkaline strippers... Applying aggressive chemicals requires components that are specifically selected for their chemical compatibility, but which also provide the sprayer with an excellent lifespan while still providing the user with comfort and performance. That is why several points have to be taken into account when choosing the sprayer adapted to one's needs

The sprayer trigger

The trigger is an essential part of the sprayer as it is the part that is in contact with the user's hand but also with the chemical.

LASER INDUSTRIE sprayers are equipped with the «Profile» trigger which provides optimum comfort during use thanks to its ergonomic shape and guarantees safe and reliable use for the operator.

For example, our «special for acid» trigger includes a seal that isolates the spring of the handle from the sprayed liquid which protects the pistons and therefore the trigger.

The quality of the hose

In order to guarantee long life for our sprayers, all of our hoses are woven in order to guarantee excellent resistance over time. The latter are all manufactured in France by Tricoflex, the reference in hoses.

We have selected the hoses according to the type of application. Our Expert Viton models are as such equipped with hytrel hoses, a material that is highly resistant to solvent chemicals.

The various seals of the sprayer

- Types of seals

Most of the LASER INDUSTRIE sprayers are equipped with «CUP» seals which allow for more contact surface compared to conventional «O-ring» seals. This specificity protects the pump for a longer lifespan and increases pumping efficiency.

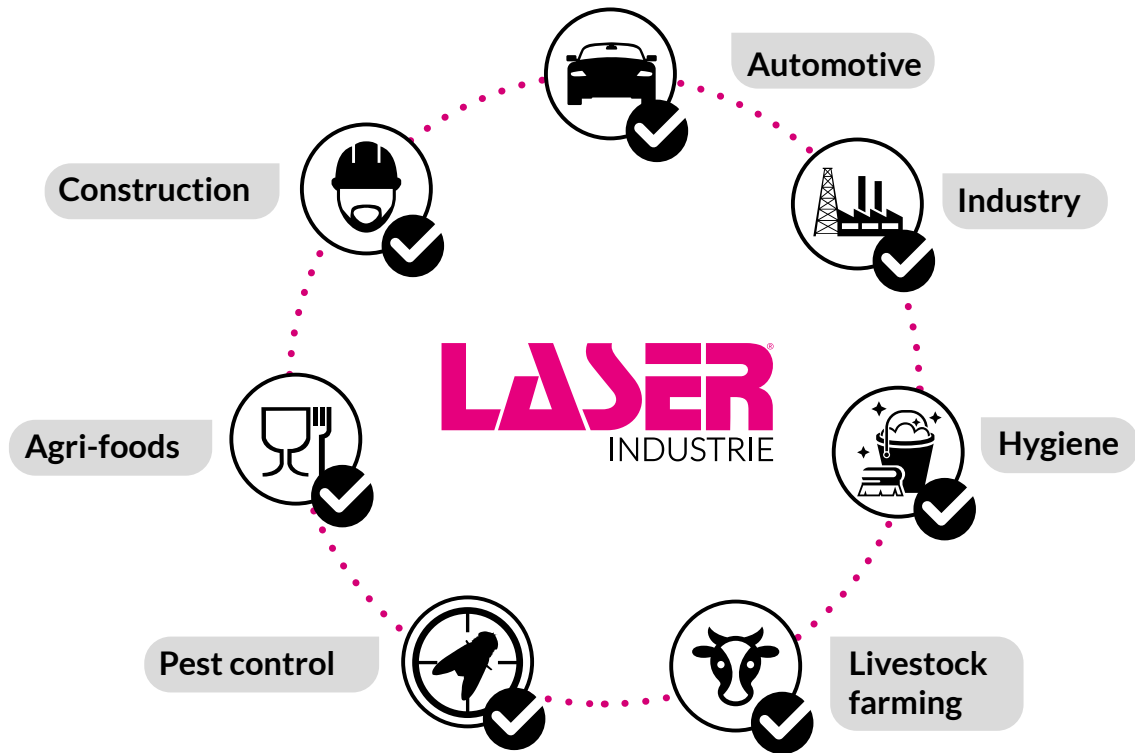

Types of sprayable chemicals

As with seals, sprayers are designed to resist a range of chemicals thanks to specific components (seals, material of the lance, quality of the hose, valve, pump ...)

The 3 major families of chemicals are :

- Neutral /non-corrosive products
- Acid products with a solvent base
- Alkaline products with a chlorine base

A CLEAR SEGMENTATION

Thanks to our product revamp, it is now much easier to make the right choice from the extensive LASER INDUSTRIE range:

- By a simple language :
 - Segmenting products by **type of activity**
 - **Colour coding products according to the materials to be sprayed** (pH, adapted seals)
- Thanks to a **complete and consistent range** in order to meet the market expectations
- By clearly communicating **the key-product benefits** of our LASER INDUSTRIE ranges

SEALS

The presentation of the LASER INDUSTRIE product range enables you to identify the correct sprayer according to the pH of sprayed product. In addition, each component (seal, lance, trigger, hose, etc) has a spectrum of resistance to different chemicals. So, we propose sprayers with the most appropriate combination of materials according to the material to be sprayed.

 Please consult us to verify the compatibility of our product with the sprayed product technical data sheet..

Acid products

Oils and petroleum derivatives, Diluted acids, Detergents, Aliphatic or aromatic or chlorinated solvents, Strong acids but only slightly oxidising

Among its different ranges, there is a range of Laser Industrie products compatible for hygiene actions. Indeed, these products are intended for cleaning needs and disinfection operations through the application of chlorinated disinfectants (bleach, disinfectants, antibacterial products, some acids, etc).

The spraying of bleach or disinfectants can be done with the following Industrial Laser Sprayers:

| Compatible triggers (Hygiene range) : | | | | Compatible small sprayers : | |

SOME INFORMATION ABOUT BLEACH

Bleach is available in liquid form (in bottles and cartons - conservation 3 years) or in solid form (in tablets - conservation 3 months). For this reason, the tablets must be diluted quickly (with cold water). If these times are exceeded, the product no longer disinfects. Bleach should be stored away from light and heat.

Bleach is marketed in several dilution levels, each with a specific name :

- Bleach extract: product containing 9.6% active chlorine;
- Bleach: product containing 2.6% active chlorine;
- Eau de Labarraque: diluted bleach.

Today, bleach is sometimes incorporated into detergents to provide «2-in-1» products that clean and disinfect.

The wearing of personal protective equipment (such as overalls, goggles, gloves, masks, etc.) is mandatory when handling Laser Industrie sprayers and aggressive chemicals.

VERSATILE PUMP SPRAY HEADS

- Nozzles with an adjustable and adaptable stream
- Filter-equipped dip tubes
- Sealed models on tank (see compatibility with tanks, p.14)
- Available in different colours
- Different flow rates according to the models (see summary table, p.13)

CANYON

- The market reference for professional triggers
- Ergonomic spray head for that is very comfortable to use (4 fingers)
- Equipped with nitrile
- Product available while stocks last !

Exel 7 Viton / Exel 10 Viton

Application of solvent-based products

- Capacity (Exel 7 / Exel 10) : 5L / 8L
- Non-locking lance handle, according to European standard, with built-in filter, equipped with Viton seals
- Polyethylene translucent graduated tank
- Pump fitted with Viton seals
- 30cm aluminium lance
- Adjustable jet nozzle from straight jet to mist jet
- 3 bar pressure release valve
- Adjustable straps
- Large pumping handle for a better grip and allowing the lancing of the lance
- Large top hole for easy filling and emptying
- Total dump because no retention area
- Supporting pommel: hold for pressurizing, emptying and filling
- Translucent and graduated tank for easy measurement

Laser 7 Viton / Laser 12 Viton

For the application of retarders and dilute acids. Compatibility table supplied with the sprayer.

- Capacity (Laser 7 / Laser 12): 5 liters / 8 liters
- Special acid-resistant polypropylene lance handle with Viton seal
- Nozzle holder and adjustable 1.5/1.0 nozzle with Viton seal
- Equipped with a flat fan nozzle
- Pump and 3 bar pressure release valve with Viton seal
- Polyethylene translucent graduated tank
- Armed, flexible and translucent hose
- Large straps with easy fixing
- Wide opening for easy filling and complete emptying (no liquid traps)
- Handle: for holding the tank while pumping, emptying and filling
- Translucent, graduated tank for precise measurement
- 40cm composite lance

i9 CMP

For the application of concrete form oils, impermeable façade coatings, chemicals for treating wood and roof timbers, solvent strippers, detarring solvents, etc..

- Capacity : 6 l
- Supplied with additional nozzles: brass fan jet nozzle with 110° angle and stainless steel cone jet nozzle 15/10°
- Brass pressure release valve, with Viton seals calibrated at 6 bar
- Carry straps, pressure gauge
- Pressed steel tank with a single weld at the base of the tank, total emptying without liquid traps, black cataphoric epoxy coating
- 40 cm brass lance tube
- Reinforced hose. Connector at the top of the tank
- Packaging: individual box
- Brass lance tube
- Brass lance handle with Viton seals
- Fixed off-centred pump integral with the tank (no longer necessary to remove it in order to fill and empty the tank)
- Wide filling orifice located on top of the tank with elliptical shaped stainless steel cover
- Multi-use side handle also acting as a protective hoop for accessories located on top of the tank
- Compatible with compressor for a quick pressurization

CONTINUOUS PUMP SPRAYERS

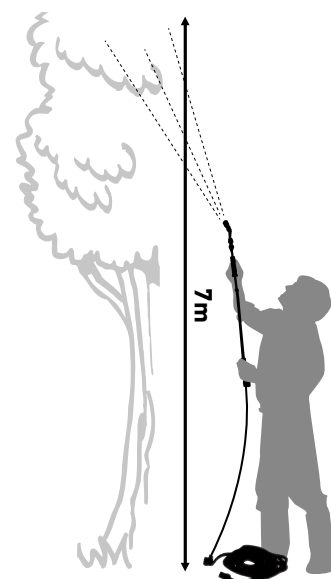

BERTHOUD

Seringa 10m

For working at heights until 7m

- «Double action» syringe sprayer operating in two directions
- 2 multi-purpose multi-directional nozzles (swirl and flat fan)
- 10 m hose
- High operating pressure (8-10 bars depending on the pumping rate)
- Can be connected to a sprayer hose to use the tank as a reservoir
- 60 cm lance extension to treat areas that are difficult to reach
- Viton® seal to withstand hydrocarbons and solvents
- Clip to prevent the hose coming out of the container
- Strainer to filter liquids to avoid clogging the nozzle

Fan jet nozzles

Fan jet nozzles for medium width spray

These nozzles are made from a variety of materials: polypropylene, acetal or sintered alumina in different colours and with different angles to show their particular flow rates in l/min.

| | | Flow rate (literss / minute) | | | | | | | | |
|------------------------|---------|------------------------------|---------|---------|---------|---------|---------|------------------|---------|---------------|
| Material of nozzle | | Acetal | | | | | Brass | Sintered alumina | | Polypropylene |
| Jet angle | | 80° | 80° | 110° | 80° | 80° | 110° | 110° | 110° | 110° |
| Colour of nozzle | | | | | | | | | | |
| Pressure | 1 bar | 0,560 | 0,840 | 1,120 | 0,400 | 0,360 | | 0,700 | 0,910 | 1,030 |
| | 1,5 bar | | | | | | 1,200 | 0,880 | 1,100 | 1,150 |
| | 2 bar | 0,650 | 0,970 | 1,290 | 0,560 | 0,500 | 1,360 | 0,970 | 1,290 | 1,430 |

NOZZLES

Deflector nozzle

With mirror stream for large-width application

Nozzles made of different materials: polypropylene, acetal resin, sintered alumina with different colours and angles to symbolise their specific flow rates in l/min.

| Material of nozzle | | Pressure | | | |
|------------------------|---------|---|---|---|---|
| | | Acetal | | | |
| Jet angle | | 105° | 110° | 110° | 135° |
| Colour of nozzle | |  |  |  |  |
| Pressure | 1 bar | 0.460 | 1.150 | 1.390 | 2.310 |
| | 1.5 bar | 0.570 | 1.410 | 1.700 | 2.830 |
| | 2 bar | 0.650 | 1.630 | 1.960 | 3.270 |
| | 2.5 bar | 0.730 | 1.830 | 2.190 | 3.650 |
| Nitrile tip code | | 282 460 | 282 457 | 282 490 | 282 491 |
| Viton tip code | | | 282 683 | 282 849 | 282 850 |
| Nitrile nozzle code | | | 282 366 | | |
| Width sprayed at 0.5 m | | 130 cm | 143 cm | 143 cm | 241 cm |
| Width sprayed at 1 m | | 260 cm | 286 cm | 286 cm | 482 cm |

TRIGGERS

Profile trigger (Viton / Viton for acids / EPDM)

- + Comfortable to use (the angle between wrist and lance gives a natural wrist position)
- + Reliable (the spray is controlled by a needle valve at right angles to the flow of liquid)
- + Very easy to maintain (the spring and piston are easy to dismantle)

Shell handle

- + Comfortable to use
- + Very easy to maintain
- + Integrated filter

Without shell handle (Nitrile)

Brass trigger

- + Brass handle with Viton seals for hydrocarbon based solvents.
- + Used with special brass lance tube. ref. 382283*

*Spare parts references available under the commercial conditions of spare parts

PRESSURE REGULATOR

No-drip 1 bar pressure regulator

BERTHOUD

- 1 bar constant pressure (preventing underspraying and overspraying)
- Can save up to 50% on chemicals
- Used with pre-pressurised sprayers, will extend acreage covered
- Used with pressure sprayers, will reduce the number of pump strokes required
- Can be used with all commercially available professional nozzle tips

283 983

LANCE TUBES

Telescopic lance tube

- 0.5/1 m lance tube
- Adjustable nozzle
- Viton seals

280 362

Brass lance tube

- 0,4 m lance tube
- Viton seals
- Compatible with Brass handle ref. 282733

382 283*

FULL LANCES

- To suit profile trigger
- Tube, nozzle holder and nozzle included

| | Ref | Tube | Handle | Compatibility | Lenght |
|------------------------|---------|-----------|-------------------------------|-------------------|-------------|
| Full lances | 283 208 | Composite | Profile « spécial for acids » | Laser 7/12 | 0,4m |
| Telescopic full lances | 280 464 | Composite | Profile Viton | Laser 7/12 | 1,3m - 2,4m |
| | 282 623 | | | Expert 8/14 Viton | 1,3m - 3,6m |

*Spare parts references available under the commercial conditions of spare parts

LANCE EXTENSIONS

Composite lance extension

- Length: 0,6 m

282 433*

Brass lance extension

- Length: 0,6 m

211 250*

WEED KILLING

4 jet weed killing spray bar

- + Converts the single jet sprayer into a multi-jet sprayer
- + Essential for spraying large areas rapidly.
Recommended for use with constant pressure backpack sprayers.

215 071

Spray shield

- + Essential for localised weed killing or spraying easily and safely (fan jet nozzle)

455 004

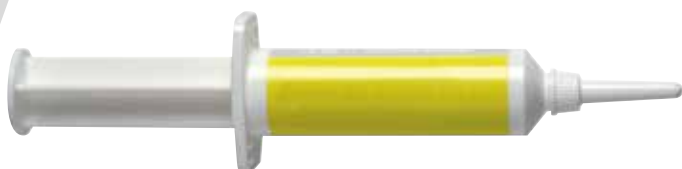

*Spare parts references available under the commercial conditions of spare parts

MAINTENANCE

Grease syringue

- Indispensable for maintaining the seals in your sprayer
- Easy to use
- Prolong the life of your sprayer by using the correct grease

219 374

MAINTENANCE KITS

+ All sprayer wear parts are available in repair kits
